Report of Investigations 86-2
AN INDEX TO ALASKA ORGANIZATIONS,
THEIR MANAGEMENT RESPONSIBILITIES,
INFORMATION RESOURCES, AND STAFF EXPERTISE:
SURVEY RESULTS FOR THE NORTHERN
INFORMATION NETWORKING CONFERENCE

By Merlin J. Wibbenmeyer

In cooperation with Municipality of Anchorage,
U.S. Department of the Interior Bureau of Land
Management, and the University of Alaska Arctic
Environmental Information and Data Center

STATE OF ALASKA
Department of Natural Resources
DIVISION OF GEOLOGICAL & GEOPHYSICAL SURVEYS

According to Alaska Statute 41, the Alaska Division of Geological and Geophysical Surveys is charged with conducting 'geological and geophysical survey's to determine the potential of Alaskan land for production of metals, minerals, fuels, and geothermal resources; the locations and supplies of ground water and construction materials; the potential geologic hazards to buildings, roads, bridges, and other 'installations and structures; and shall conduct such other surveys and investigations as will advance knowledge of-- --the geology of Alaska.'

In addition, the Division of Geological and Geophysical Surveys shall collect, record, evaluate, and distribute data on the quantity, quality, and location of underground, surface, and coastal water of the state; publish or have published data on the water of the state and require that the results and findings of surveys of water quality, quantity, and location be filed; require that water-well contractors file basic water and aquifer data, including but not limited to well location, -estimated ..elevation, well- -driller's logs, pumping tests, flow measurements, and water-quality determinations; accept and spend funds-for the purposes of this section, AS 41.08.017 and 41.08.035, and enter into agreements with individuals, public or private agencies, communities, private industry, and state and federal agencies; collect, record, evaluate, archive, and distribute data on seismic events and engineering geology of the state; and identify and inform public officials and industry about potential seismic hazards that might affect development in the state.

Administrative functions are performed under the direction of the State Geologist, who maintains his office in Anchorage. DGGS offices are located at:

.794 University Ave. (Basement) Fairbanks, 99709 (907)474-7147	.3601 C St. (8th fl.) P.O Box 7028 Anchorage, 99510 (907)561-2020
.400 Willoughby Center (3rd fl.) Juneau, 99801 (907)465-3400	.Fish Hatchery Road P.O. Box 772116 Eagle River, 99577 (907)688-3555

This report is for sale by DGGS for \$2. DGGS publications may be inspected at the following locations. Mail orders should be addressed to the Fairbanks office.

AN INDEX TO ALASKA ORGANIZATIONS, THEIR MANAGEMENT RESPONSIBILITIES,
INFORMATION RESOURCES, AND STAFF EXPERTISE:
SURVEY RESULTS FOR THE NORTHERN INFORMATION NETWORKING CONFERENCE

By
Merlin J. Wibbenmeyer¹

INTRODUCTION

A survey was conducted prior to the Northern Information Networking Conference (NINC) to determine the information requirements of organizations in Alaska. Results of this survey provided the basis for discussions of information needs at the NINC workshops.-

The survey form (app. 1) was sent to the following organizations.

AHTNA Corporation
Alaska Department of Administration²
Alaska Department of Commerce and Economic Development (Economic Analysis Section)²
Alaska Department of Community and Regional Affairs
Alaska Department of Environmental Conservation²
Alaska Department of Fish and Game
Alaska Department of Natural Resources²
Alaska Department of Transportation and Public Facilities
Alaska Power Authority
Atlantic Richfield Company²
Bering Straits Native Corporation
Bristol Bay Native Corporation
Calista Corporation
Chugach Alaska Corporation
Cook Inlet Region, Inc.
Doyon, Ltd.
Koniag Corporation
Matanuska-Susitna Borough²
Municipality of Anchorage²
NANA Regional Corporation
North Slope Borough
Sea Alaska Corporation
Setpoint Alaska, Inc.
SOHIO
U.S. Army Corps of Engineers (Alaska District)
U.S. Department of Agriculture Forest Service (Anchorage Forest Sciences Laboratory)²
U.S. Department of Agriculture Forest Service (Juneau)²
U.S. Department of Commerce National Oceanic and Atmospheric Administration²
U.S. Department of Interior Fish and Wildlife Service²
U.S. Department of Interior Bureau of Mines²

¹DGGS, P.O. Box 7028, Anchorage, Alaska 99510.

²Organization that responded to survey.

U.S. Department of Interior Geological Survey (National Mapping Division)
U.S. Department of Interior Bureau of Indian Affairs²
U.S. Department of Interior Bureau of Land Management²
U.S. Department of Interior Minerals Management Service²
U.S. Department of Interior National Park Service
U.S. Environmental Protection Agency,
U.S. Federal Aviation Administration
University of Alaska Arctic Environmental Information and Data Center
University of Alaska Institute of Social and Economic Research

The survey solicited information in five areas:

1. Types of management responsibilities associated with an organization.
2. Information requirements needed to address each organization's responsibilities.
3. Geographic areas of Alaska to which organization responsibilities and associated information requirements pertain.
4. Resources (such as people, funds, information, or computer systems) available to organizations for meeting their information needs.
5. Existing systems within organizations that could be used to coordinate available information.

Some organizations responded to the questions in great detail, and some have a relatively wide range of responsibilities. Thus, the survey results (app. 2-8) show they may use more types of information or may have more information resources available.

SURVEY RESULTS

Organizations that responded to the survey and the management/responsibility themes they identified for their organization are shown in figure 1. Table 1 provides an explanation of the abbreviations used in figure 1 and the appendixes. Survey data are presented in appendixes 2-8.

Appendix 1, 'Survey form sent to organizations,' contains a copy of the survey form sent to the organizations listed on page 1 and definitions of the data topics.

Appendix 2, 'Correlation of organization responsibilities with data topics used by each organization,' categorizes the information used by each organization by management/responsibility theme. A chart for each of the 28 management/responsibility themes correlates organizations with the data topics they use to fulfill their responsibilities. To use the charts, scan the index at the beginning of appendix 2 (p. 23) and select the management/responsibility theme that interests you (the themes are listed alphabetically). Turn to the theme you selected and review the organizations by data topic to determine the organizations that use each data topic for the responsibility theme selected. These charts can help you locate other information sources that may apply to your organization's management

responsibilities. For example, if you select the theme 'Resource data collection/distribution,' you can identify the organizations that collect and distribute various types of resource data.

Appendix 3, 'Management/responsibility themes, project names, staffing, and funding of organizations,' lists specific projects or programs conducted by the respective organizations. The projects and programs are indexed by the management/responsibility themes with which they correspond. Staffing and approximate funding for these projects are also listed. To use appendix 3, select the management/responsibility theme in which you are interested (p. 53). For example, if you want to know the organizations that have projects in land conveyance and/or disposal and the names of the projects, see appendix 3.

Appendix 4, 'Brand names and types of computers owned by organizations,' lists the size (mainframe, minicomputer, or microcomputer), brand name, and number of units owned by the responding organizations. If you want to exchange computer data files with another organization, this appendix provides basic information about computer facilities (p. 57).

Appendix 5, 'Networked computer-resource facilities subscribed to by organizations in Alaska,' identifies computer facilities that are currently used by organizations in addition to or in lieu of in-house facilities. The computer linkage is designated as a direct **hardline** network, or an indirect dial-up network. If you know a particular computer-resource facility (linked organization) has information that you need, appendix 5 (p. 61) will tell you if an organization in Alaska is **linked** with that facility and the type of use subscribed to by that organization (for example, data storage, retrieval, or statistical or geographical analysis).

Appendix 6, 'Data bases indexed by type,' separates data bases into four general categories: financial, library, maps, and reference³ files. The specialty, organization, and name of the data base are listed by data-base type. For example, if you want a financial data base related to confidential mineral information, contact the U.S. Department of Interior Bureau of Land Management for the data-base PRESTO (p. 65).

Appendix 7, 'Organization staff expertise indexed by specialty,' separates staff expertise of the responding organizations into six categories: economic analysts, financial analysts, information specialists, policy analysts, resource analysts, and scientists. The organization name and discipline are listed by category. For example, if you want an economic analyst with expertise in economic geology, contact the Alaska Department of Natural Resources Division of Geological and Geophysical Surveys for information (p. 71).

Appendix 8, 'Research and publication activities and resources of organizations,' lists organizations that can systematically search existing information, have formal procedures for coordinating data and information projects, and have established facilities for publishing information. For example, this appendix shows that the U.S. Department of Interior Geological Survey and the Alaska Department of Natural Resources Division of Geological and Geophysical Surveys have established procedures and facilities to publish geologic information (p. 79).

SUMMARY

Data presented in this report may be useful to identify information sources, organization responsibilities, individual expertise, and computer resources that you may use to address your information needs. This survey can be expanded and updated on a regular basis. The participation of the responding organizations is gratefully acknowledged as the key factor responsible for the success of the survey.

For further information, please contact Merlin J. Wibbenmeyer at the Alaska Department of Natural Resources Division of Geological and Geophysical Surveys, P.O. Box 7028, Anchorage, Alaska 99510 (phone 907-762-2145). The Department's main offices are located in the Frontier Building at 3601 C Street, Anchorage.

ACKNOWLEDGMENTS

I thank Ray Thomas (Department of Interior Bureau of Land Management) for his assistance and support in preparing and distributing the survey form and Pat Leiberman (Municipality of Anchorage) for reviewing the survey form and coordinating the printing of the report by the Municipality of Anchorage. I also thank the following DGGS staff: Doug Jones for preparing the automated data-base design and data entry; Jim Jurgens for his assistance in producing the draft reports for the Northern Information Networking Conference; George Dickison for preparing the initial chart design; Jean Tam

³Reference files consist of original, uninterpreted data.

for her assistance in producing preliminary and final versions of the charts; Cheri Daniels for expeditiously moving this document through the publication process; Valerie Reger for her editorial review and suggestions; Ann Schell for the graphics enhancement; and Roberta Mann for her typing assistance. I especially thank Ross Schaff for supporting my participation in the Northern Information Networking Conference.

Part I.

Identifying management questions and organization responsibilities

The matrix in table 1 lists key question/responsibility topics (rows) and lists the information requirements (columns 4-33) which can relate to these question/responsibility topics.

-- --

Following the question/responsibility topic column are three additional columns. In the first column, designate the location for each of the question/responsibility topics selected. Figure 1 divides the state into six general regions. Use the regions in figure 1 to designate the appropriate geographic location for each topic selected as follows:

1. Northern
2. Westcentral
3. Eastcentral
4. Southwestern
5. Southern
6. Southeastern
7. All

In the second column, designate the applicable geographic extent of your agency's management decision or responsibility. You may list more than one pertinent geographic extent category but do so in order of importance. The geographic extent categories are:

1. Statewide programs
2. Regionwide programs
3. Management programs (within regions)
4. Development programs (within management areas)
5. Site/case specific actions
6. Technical investigations
7. All

In the third column, indicate the importance to your organization of each geographic extent category identified with each question/responsibility topic. The following list is to be used to attach a priority to each question topic category - location - decision level combination which you have designated:

1. Critical - Infrequent, but must be done before routine decisions can follow.
2. Routine - Steady stream of decisions, may be daily, weekly, or monthly.
3. Low - Infrequent, but necessary, does not usually hold up other decisions.

In the remaining matrix columns, identify your information needs with respect to the question/responsibility topic you selected by making a check mark in the appropriate data topic column. If your information needs vary by geographic extent category, identify information topics for each geographic

extent category. If you have specific data topics which you wish to add, list those in the columns at the end. Likewise, if you have question/responsibility topics not listed, add them in the space provided at the bottom of the column 1 list in the matrix. The data topics are defined in Appendix 1 of the survey.

Part II.

What resources do you have at your disposal to address the needs you have identified? Resources should be interpreted as staff, funding, computer support, or reference reports, maps, or specialized data banks.

- A. A project or program can be considered as a resource if it functions as a unit to collect, analyze, interpret, or produce information products in support of decision making. Examples include soils survey team, forest inventory project, public opinion ~~survey~~ team, planning team, policy analysis group, construction design staff, etc.

Program/Project Name	No. of Staff	Annual Funding (estimate)
_____	_____	_____
_____	_____	_____
_____	_____	_____

- B. Generally describe the automated equipment which you currently have on hand to support your information needs. Do not describe in detail. The purpose is to get an idea of the type and size of automated support available.

Main frame, computer, model/size	_____
Mini computer, model/size	_____
Micros, brands	_____

- C. What other automated information systems are you currently linked with or are you using? If you are using and connected via a hard-wire hookup to other systems check 'Direct Link' (i.e. not dial up access). Name the organization and what you use the system for.

Direct Link	Organization	Type of Use			
		Storage	Retrieval	Analysis	Geographic Statistical Analysis
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____

D. Do you have specialized data banks within your organization?

No
 Yes

Name	Maps	Financial	Library	Reference	List	Type Speciality

Examples of specialized data banks are BLM's Alaska Resource System or DNR's Land Administration System.

E. Are you aware of **inhouse** specialized staff?

Very aware
Generally aware
Have no idea

What 'types' of specialized staff do you have?

	Primary	Disciplines
Resource analysts		
Economic analysts		
Policy analysts		
Financial analysts		
Scientists		
Information specialists		

Discipline types: forest, soils, geology, biology, budget, etc.

Part III.

Prior to beginning a project, you need information: Does your agency have a standardized procedure for obtaining information prior to beginning a project?

Yes
 No

A. If yes, please mark the steps your agency would take before initiating a project.

Searching on-line bibliographic literature
Researching library collections
Contacting other agencies
Contacting specialists in that subject

B. Does your agency have a position which is the focal point for coordinating this information? Yes No

If yes, what is the job title?

If no, whose responsibility is this?

Does the position operate solely within the agency?

Yes No

C. Does your agency have a standardized process for publishing and distributing agency publications? Yes No

Does one position coordinate the process? Yes No

If yes, what is the job title?

Part IV.

We plan to use the matrix to update the information needs. This will assist in coordinating statewide information exchange. Please present your ideas, comments, and suggestions about ways to improve access to information or its presentation.

Survey form
(appendix 1)

DATA TOPIC DEFINITIONS

Data Topic	Description
Permits	This data topic covers a range of permitting activities. Individual data elements associated with this data topic include location of a permit , lease, easement or other such activity, case file number, customer name, billing information, type of disposal, expiration date, title restrictions , contract obligations, water rights, appraisal status, historical actions, etc.
Land Status	This data topic refers to the tenure and or classification of land. The land status data topic identifies ownership in terms of state, municipal, federal, Native, and other private ownership. Land classifications and withdrawals are other elements within this topic.
Boundaries	This topic refers to a cartographic representation of major jurisdictional units such as boroughs, parks, coastal zones, Native regions, etc. Special districts including school, census, sewer and transportation zones are included.
Topography	This topic encompasses a range of information elements which are all dependent to some degree on the topographic variation of the earth's surface above and below sea level. This includes particularly elevation& slope, and aspect data elements.
Land Cover	A data topic that classifies the vegetational and artificial constructions covering the land surface. Land cover information, generally mapped, and often remotely sensed, indicated the general characteristics of the earth's surface in terms of

	forest, agricultural, range, tundra, ice, urban or wetlands. It is a general indication of the surface character.
Natural Hazards	This data provides a flag to the potential presence of natural hazards in an area. Specific hazard information might include the potential for erosion, landslides, earthquakes, tsunamis, volcanoes, flooding, and permafrost damage. Hazards may represent immediate danger to life or property or long-term constraints to development including slumping, sliding, frost heaving, etc.
Climate	Y-Specific data elements within this topic include measures of average temperatures, precipitation levels, frost free days, humidity, and wind regimes.
Geology	This data topic references a wide variety of geologic and geophysical data elements. Data elements include geologic maps, bulk rock samples, magnetic and aeromagnetic maps, seismic indicators, shear strength indicators, strain histories, liquefaction potential, measures of porosity and permeability, and assays.
Soils	Soil characteristics such as drainage capability, percolation, bearing capacity, organic content, depth to bedrock, shrink-swell potential, and susceptibility to erosion are included in this data topic.
Surficial Geology	Surface geology characteristics such as topography, landform, material composition, presence of permafrost, and structural stability are included in this data topic.
Hydrology/Watersheds	This data topic references a variety of water-related information items, watershed boundaries, stream levels, water quality, water rights, water use, sediment loads, water runoff by land use, dam safety, and instream flows.

Forestry	This data topic references a variety of forest-related data elements including stand location, species, cruise data, scale volume, value, fire potential, protection responsibility, acreage, growth rates, and survival rates.
Agriculture	Identifies lands currently in agricultural production, crops produced, agriculture potential, and grazing lands.
Hardrock Minerals	A data topic which identifies known mineral deposits, mineral activity and mineral potential in an area. Hardrock minerals include silver, gold, tungsten, etc., but exclude coal and other petroleum resources.
Energy Resources	This data element contains information about a variety of energy producing resources, including oil and gas. Coal, hydropower resources and geothermal areas are also associated with this data element. Known occurrences, current exploration and mining activity and potential future values are all covered.
Wildlife Species/Populations	This data topic covers species distributions by season or other time period, species census data, reproduction and regeneration, harvest statistics.
Wildlife Habitat	This data topic deals with data describing or delineating actual or potential habitats for various wildlife species.
Fisheries Species/Populations	This data topic covers species distributions by season or other time period, species census data, reproduction and regeneration, harvest statistics.
Fisheries Habitat	This data topic deals with data describing or delineating actual or potential habitats for various fish species. Data identifying anadromous stream is included in this topic.

Subsistence	This data topic covers patterns and level of subsistence use, current or historical. It also includes data on subsistence resources, and potential subsistence use.
Historic/Cultural Resource	Required data elements within this topic include the location, preservation status, age, size, and quality of known or suspected historic sites.
Recreation	This topic includes data in recreation use, facilities, and resources potentials. Scenic values are also included.
Land Use	This data topic, generally in mapped form, classifies developed land according to its current use.
Transportation/Access	This data topic indicates the degree of access available to a given point, line, or area in Alaska. Existing or planned road networks are included, as are traditional means of access (foot, snowmobile, riverboat, etc.) where applicable. Air and water forms of access or potential access are included.
Utilities/Facilities	This data topic contains such data elements as existing or planned hydro-electric facilities, transmission lines, pipelines, sewer/water lines, park facilities, etc.
Regional Economics	This data topic provides an indication of the general character of the economy within a region as indicated by employment and income levels, development trends, building and manufacturing activity, etc. This data topic also summarizes the economic 'character' of the region for land management purpose.
Demographics	This data topic identifies the age and composition of the current and projected population within a region. Includes population estimates and projections as well as assessments of age/sex distributions and educational levels of the population.

Commodity Costs

This data topic refers to a set of up-to-date commodity costs relevant to Alaskan land management such as the present market value of developed and undeveloped land, residential structures, hardrock minerals, oil and gas, and primary and secondary roads.

Policies/Plans/Legislation

This data topic includes local comprehensive or capital improvement plans, state, federal, and local laws, other agency policies and regulations, and private organizations' goals and objectives as required data elements;

APPENDIX 2

Correlation of organization responsibilities with data topics used by each organization

Management/responsibility themes represent general areas of organization responsibilities. Management themes are labels assigned to management activities of an organization rather than information (data topics) an organization may use to fulfill its responsibilities.

<u>Theme</u>	<u>Page</u>
Administrative	25
Agriculture	26
